

## SURVEY ENGINEER / DATA MANAGER HF

### ISRAEL(Tel Aviv)

du 01 novembre 2019 au 01 novembre 2020(pour 12)

ETABLISSEMENT : SIXENSE SOLDATA

REMUNERATION MENSUELLE : 2379€ (indemnité non contractuelle fixée par décret et arrêté, dont le montant peut varier notamment en fonction de l'évolution du barème de référence, de la localisation de la mission et des cas d'abattements prévus par les textes)

Company: SIXENSE SOLDATA SAS ISRAEL

SIXENSE is a group of world-class excellence in digital services and solutions specializing in infrastructure, soil and the environment in order to understand, analyse, anticipate and optimize our clients investments.

SIXENSE principal mission is to provide support to designers, builders, operators and infrastructure owners in order to successfully overcome three challenges facing them : construction project management, asset management, risk management.

### Position:

The position will be mainly within our monitoring team working on the construction of the 1st underground line of Tel Aviv (The RedLine Project) focusing on automatic total station systems and manual precise levelling, but not only.

The job will involve installation, maintenance and decommissioning of complex monitoring systems (including automatic total station and manual precise levelling networks and other geotechnical and structural instrumentation) i.e. installation, configuration, maintenance optimization and removal, data processing, preparing and validating data reports, checking surveying data quality, etc, ....

The position might also involve occasional manual surveying (X,Y,Z and levelling). It is an evolutive position and the candidate might be involved on others Israeli projects depending on awards during the duration of his/her VIE.

### Applicant:

We need a young motivated Engineer who is happy to share his/her time between site works and office.

### Profil candidat :

Nb de poste à pourvoir : 1
